Q2   // Program to Merge files.

```java
import java.io.*;
public class fileMerge
{
    public static void main (String [] args)
    {
        PrintWriter pw = new PrintWriter ("file 3.txt");
        BufferedReader br = new BufferedReader (
                new fileReader ("file1.txt"));
        String line = br.readLine ();
        while (line b = null)
        {
            pw.println (line);
            line = br.readLine ();
        }
        br = new Buffered Reader (new file Reader ("file2.txt"));
        line = br.readline ();
        While (line != null
        {
            pw.println (line);
            line = br.readline ();
        }
```

```
            pw. flush ();
            br. close ();
            pw. close ();
            System. out. println (" Merged file 1. txt
                    and file 2. txt into file 3. txt ");
        }
    }
}
```
